RE: NimbeLink Skywire 1xRTT Open Development Certification

Dear Kurt Larson:

Congratulations! On the behalf of the Verizon Wireless Open Development team, we are pleased that you are participating in the Open Development Initiative. The NimbeLink Skywire 1xRTT, under software version 0001 and hardware version 01 has been approved through the Open Development certification process.

Open Development is centered on driving innovation and providing customers with flexibility in wireless solutions. Most importantly, Open Development is designed to encourage the development community to create new products and services in addition to what Verizon Wireless currently offers. NimbeLink will now be able to market the Skywire 1xRTT to operate on the nation's most reliable wireless data network. Our customers in turn are now able to utilize these devices to support their business needs.

The Skywire 1xRTT will remain certified for three years from the date of this letter as long as it continues to satisfy the terms of the Certification Agreement between Verizon and NimbeLink. Once the three year term has expired, NimbeLink must submit the device for retesting and re-certification no less than ninety days prior to the expiration of the three year certification period for the device to remain certified.

Thank you for choosing to have your devices certified via the Verizon Wireless' Open Development program.

Sincerely,

A handwritten signature in black ink that reads "Mary Beth Hall". The signature is written in a cursive style with a long, sweeping underline.

Mary Beth Hall  
Director, VES  
Verizon Wireless

# Nimbelink

**Device:** Skywire 1xRTT Embedded Cellular Modem (NL-SW-1xRTT)

**Category:** Embedded Modem

**General Availability:** 10/01/2013

**Target Price:** \$99 **Service Price Plan:** **Contact Sales for bundled plans (Effective Date: 09/15/2013)**

**Key Features:**

- **Dimensions:** 29mm x 33mm x 10mm
- **Air Interface:** Dual Band CDMA 1xRTT
- **Hardware Supported Connections:** RS232, USB
- **WiFi Support:** No
- **GPS (assisted or standalone):** Yes, assisted via cellular network, non-satellite
- **AutoFailover from alternate WAN (routers only; Y/N):** N
- **Operating System:** N

Creating low cost M2M devices has never been easier than with the Nimbelink Skywire Embedded Cellular Modem. Supporting 1xRTT communication at the lowest CDMA socket modem price point allows product developers to focus on the application and avoid any of the costly certification hurdles associated with building a cellular enabled device. Designed as small as embedded technologies allow, it also complies to the XBEE standard interface making this an easy-to-use module in a familiar form factor.

**Certified by OD on: 10/24/2013**
