RE: NimbeLink NL-SW-EVDO (Skywire EVDO) Open Development Certification

Dear Kurt Larson:

Congratulations! On the behalf of the Verizon Wireless Open Development team, we are pleased that you are participating in the Open Development Initiative. The NimbeLink NL-SW-EVDO (Skywire EVDO), under software version 0001 and hardware version 01 has been approved through the Open Development certification process.

Open Development is centered on driving innovation and providing customers with flexibility in wireless solutions. Most importantly, Open Development is designed to encourage the development community to create new products and services in addition to what Verizon Wireless currently offers. NimbeLink will now be able to market the NL-SW-EVDO (Skywire EVDO) to operate on the nation's most reliable wireless data network. Our customers in turn are now able to utilize these devices to support their business needs.

The NL-SW-EVDO (Skywire EVDO) will remain certified for three years from the date of this letter as long as it continues to satisfy the terms of the Certification Agreement between Verizon and NimbeLink. Once the three year term has expired, NimbeLink must submit the device for retesting and re-certification no less than ninety days prior to the expiration of the three year certification period for the device to remain certified.

Thank you for choosing to have your devices certified via the Verizon Wireless' Open Development program.

Sincerely,

A handwritten signature in black ink, appearing to read "Mary Beth Hall".

Mary Beth Hall
Director, VES
Verizon Wireless

Telemetry / Certified Modem Module

Device: Skywire EVDO

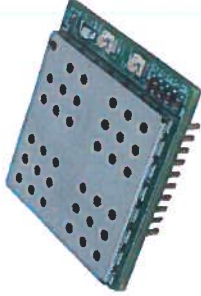

Category: Telemetry

General Availability: 04/01/2014

Target Price: \$149 **Service Price Plan:** M2M Pricing

Key Features:

- **Dimensions:** 29mm x 33mm x 6.5mm
- **Air Interface:** Dual Band CDMA 1xRTT, EVDO
- **Hardware Supported Connections:** UART, USB, GPIO, ADC
- **WiFi Support:** No
- **GPS (assisted or standalone):** GPS & GLONASS capable
- **AutoFailover from alternate WAN (routers only; Y/N):** N
- **Operating System:** None

The Skywire EVDO embedded cellular modem is the industry's smallest EVDO modem -- designed in the standard XBEE form factor for easy integration by product designers and device manufacturers. The product uses the popular Telit DE910-DUAL module at its core. It is also footprint compatible with Skywire 1xRTT, GSM and LTE modules providing an easy technology migration path.

Certified by OD on: 4/17/2014
