RE: NimbeLink NL-SW-LTE-TSVG Open Development Certification

Dear Kurt Larson:

Congratulations! On the behalf of the Verizon Wireless Open Development team, we are pleased that you are participating in the Open Development Initiative. The NimbeLink NL-SW-LTE-TSVG, under software version 0001 and hardware version 001 has been approved through the Open Development certification process.

Open Development is centered on driving innovation and providing customers with flexibility in wireless solutions. Most importantly, Open Development is designed to encourage the development community to create new products and services in addition to what Verizon Wireless currently offers. NimbeLink will now be able to market the NL-SW-LTE-TSVG to operate on the nation's most reliable wireless data network. Our customers in turn are now able to utilize these devices to support their business needs.

The NL-SW-LTE-TSVG will remain certified for three years from the date of this letter as long as it continues to satisfy the terms of the Certification Agreement between Verizon and NimbeLink. Once the three year term has expired, NimbeLink must submit the device for retesting and re-certification no less than ninety days prior to the expiration of the three year certification period for the device to remain certified.

Thank you for choosing to have your devices certified via the Verizon Wireless' Open Development program.

Sincerely,

A handwritten signature in black ink that reads "Mary Beth Hall". The signature is written in a cursive style with a long horizontal flourish at the end.
